

# Wildland Fire Safety

Every year, wildfires burn across the U.S., and more and more people are living where wildfires are a real risk. But by working together, residents can make their own property — and their neighborhood — much safer from wildfire.

## Action steps for around your home:

- **CLEAR** leaves and other vegetative debris from roofs, gutters, porches and decks. This helps prevent embers from igniting your home.
- **REMOVE** dead vegetation and other items from under your deck or porch, and within 10 feet of the house.
- **SCREEN** in areas below patios and decks with wire mesh to prevent debris and combustible materials from accumulating.
- **REMOVE** flammable materials (wood piles, propane tanks) within 30 feet of your home's foundation and outbuildings, including garages and sheds. If it can catch fire, don't let it touch your house, deck or porch.
- Wildfire can spread to tree tops. **PRUNE** trees so the lowest branches are 6 to 10 feet from the ground.
- **KEEP** your lawn hydrated and maintained. If it is brown, cut it down to reduce fire intensity. Dry grass and shrubs are fuel for wildfire.
- Don't let debris and lawn cuttings linger. **DISPOSE** of these items quickly to reduce fuel for fire.
- **INSPECT** shingles or roof tiles. Replace or repair the shingles that are loose or missing to prevent ember penetration.
- **COVER** exterior attic vents with metal wire mesh no larger than 1/8 inch to prevent sparks from entering the home.
- **ENCLOSE** eaves and screen soffit vents using 1/8 mesh metal screening to prevent ember entry.

## AND DON'T FORGET...

The more actions a community takes, the more fire adapted it becomes. Learn how you can make a difference in your community. Visit [www.fireadapted.org](http://www.fireadapted.org) and [www.firewise.org](http://www.firewise.org) for more information.

## FACT

- ! There are more than **45 million** homes near or in the wildland.
- ! More than **72,000** U.S. communities are now at risk from wildfire.
