

CARBON MONOXIDE (CO) SAFETY CHECKLIST

CO Prevention

- Yes ___ No ___ Have you installed at least one battery-powered CO alarm or AC-powered unit with battery backup on each level of your home and near sleeping areas?
- Yes ___ No ___ Does a licensed professional inspect the heating systems and other fuel-burning appliances in your home annually?
- Yes ___ No ___ Have you made sure fuel-burning appliances are installed properly and operate according to the manufacturer's instructions?
- Yes ___ No ___ Do you have all fireplaces cleaned and inspected annually, and keep chimneys clear of animal nests, leaves and residue to help ensure proper ventilation?
- Yes ___ No ___ Have you made sure not to block or seal shut the exhaust flues or ducts used by water heaters, ranges and clothes dryers?
- Yes ___ No ___ Are you careful not to leave your car running in an attached garage or carport?
- Yes ___ No ___ Are you careful not to use ovens or stoves to heat your home?
- Yes ___ No ___ Are you careful not to use charcoal or gas grills inside or outdoors near a window where CO fumes could seep into your home?
- Yes ___ No ___ Do you test all carbon monoxide alarms in your home weekly? Do they use the most accurate sensing technology?
- Yes ___ No ___ Do you replace CO alarms every seven years in order to benefit from the latest technology upgrades?
- Yes ___ No ___ Are you careful not to use generators and grills indoors during a power outage?

If you answered "no" to any questions, your home may not be safe from Carbon Monoxide
